

Professional Quality | Full Tang Construction | Ergonomic POM Handle | Lifetime Guarantee

Experience the precision, balance, and durability of a premium European-crafted chef's knife designed for both professional chefs and passionate home cooks. Built with high-quality materials and advanced blade technology, this versatile kitchen essential delivers outstanding cutting performance while maximizing comfort and control.

Key Features

Exceptional European Craftsmanship

- 100% European made for exceptional quality and reliability.
- Backed by a **Lifetime Guarantee**.

Ergonomic Medium-Sized Handle

- Medium handle size is ideal for individuals with smaller hands.
- Ergonomic design enhances comfort and control during extended use.
- Helps reduce hand fatigue while improving productivity.

Superior Blade Design

- Wider blade provides increased knuckle clearance for safer, more comfortable cutting.
- Enhanced blade profile contributes to improved longevity and performance.

Advanced Measured Grinding (AMG) Technology

- Creates an exceptionally sharp cutting edge.
- Delivers outstanding edge retention.
- Ensures optimal cutting performance along the entire length of the blade.

Best-In-Class X50CrMoV15 High Carbon Stainless Steel

The blade is crafted from high-carbon **X50CrMoV15 stainless steel**, containing:

- Chromium for corrosion resistance
- Molybdenum for strength and durability
- Vanadium for enhanced edge retention

Tempered and hardened to **57 ±1 HRC**, the blade has the ideal balance of:

- Sharpness, Durability, Ease of maintenance, Long-lasting performance

Hygienic POM Handle Construction

The handle is manufactured from **Polyoxymethylene (POM)**, a material renowned for its durability and sanitary properties.

Benefits include:

- Resistant to virtually all solvents
- High heat tolerance
- Can be boiled and fully sanitized to meet health and safety standards
- Seamlessly bonded to the blade tang using extreme heat and pressure
- Gap-free handle-to-blade construction creates a superior hygienic seal to prevent bacteria buildup

Professional Full Tang Construction

- Full tang extends the entire length of the handle.
- Provides optimal balance, strength, and control.
- Preferred by professional chefs.

Rust-Resistant Compression Rivets

- Stainless steel compression rivets won't rust or corrode.
- Deliver long-lasting structural integrity.
