BUTCHER KNIVES AND TOOLS

BONING/FILLETING KNIVES

Stiff Blade

The stiff blade is strong and rigid. A stiff blade is more often used for raw beef and pork.

Semi-Flexible Blade

A semi-flexible blade is often chosen when the Chef wants to work with just one boning knife. This blade has the benefits of both a flexible and a stiff blade. Used for fish, poultry, beef and pork.

Flexible Blade

The flexible blade is ideal for filleting raw fish. The flexible blade makes it perfect for removing skin and bones from raw fish and poultry too.

Curved Blade

The Professional Butcher may prefer to use a flexible, semi-flexible or stiff curved, "Offset" boning knife in a workplace setting. The butcher will be working in a standing position and will want to create a downward cutting action on a hanging carcass.

All knives are crafted using state of the art manufacturing technology, high carbon content steel hardened to 57±1° HRC.

BUTCHER KNIVES AND TOOLS

Breaking Knife

The strong, rigid curved blade is used to "break" through skin, light cartilage, and small bones.

Butcher Knife

Primarily used by butchers, this knife can be used to split, strip or cut meat. The curved, thicker blade allows for a more efficient rocking or twisting motion and weight for greater leverage. It can be used to cleanly cut through skin, cartilage and small bones.

Scimitar

Primarily used by butchers to cut large pieces of raw meat. The butcher would use a scimitar to portion steak. Scimitars are typically 10 inches or longer.

Skinning Knife

Generally used for field dressing an animal.
Available in either heavy duty 3.25mm thick blade or polished 2.5mm thick blade!

All knives are crafted using state of the art manufacturing technology, high carbon content steel hardened to 57±1° HRC and NSF certified anti-slip handles.
