

"Double Sharp" Sharpening Steels Overview

Non-Slip Tip

The unique "Double Sharp" design combines both the "helical/spiral" and the "precision" cuts. The coarse "spiral" cut is ideal for putting an edge on a blunt (i.e. dull) knife blade. The "precision" cut (or "Continental" cut) has unbroken cuts running the length of the steel blade. In combination, the two cuts help to restore a blunt edge quickly and with continued use, help to maintain the restored edge. The edge will not be as fine as that produced by a precision cut steel.

High Carbon Chrome Vanadium Steel, hardened to 64° Rockwell C and hard chrome plated.

1½" Square Guard for Protection

Sterilizable, Non-Absorbent, Polypropylene Handle

Stainless Steel Hanging Ring

**Made in
Sheffield England**
